BioMol Therapy is one of the top-rated manufacturer of Red Light Therapy devices with 2200 squaremeters factory in Shenzhen China since 2015.

We have over 60 staff members to ensure a production capacity of 2000pcs per month for quick lead time. Our products are top quality built with CE, RoHS, FCC, FDA certificates, and our factory complies with ISO:9001 standards.

For an enterprise, innovation is the foundation of long-term development. LIYA GROUP has a strong R&D team of over 10 people to ensure continuous product innovation each year. All our products have patented with unique designs, and we are the ONLY company making Red Light Therapy device with Voice Control, and also the ONLY one to divide the products line into 7 series based on its application.

Our product series are:

Portable Series

Household Series

General Series

Beauty Medical Series

Fitness Series

Wearing Series

Others...

Based on our professional and strong R&D team, you are always welcome to customize your exclusive products with our OEM&ODM service, and we offer FREE design service.

Please buy and use our products with confidence. Based on our quality assurance, we provide three years warranty with FREE replacement for after-sales service.

Choosing BIOMOL as a business partner will provide you high-quality guarantee services for your market competition and long-term development.

Let's begin a win-win cooperation for now!

CEO

Ivy / Miss Chao

What is red light therapy?

Red light therapy, also known as photobiomodulation or low-level laser therapy (LLLT), is a non-invasive treatment that uses red and near-infrared (NIR) light to stimulate cellular activity and promote healing. The therapy has gained popularity in recent years due to its potential benefits in various areas of health and wellness.

What can red light therapy do?

Skin Care & Anti-Aging

- Promote collagen synthesis: Red light therapy can promote the synthesis of collagen in the skin, making it more firm and elastic.
- Improve pigmentation: Red light therapy can regulate collagen production, reduce pigment deposition, and improve pigmentation problems.
- Shrink pores: Red light therapy can promote the metabolism of skin cells, clean and shrink pores.

Acne

- Promote skin metabolism: Red light therapy can promote the metabolism of skin cells, stimulate the mitochondria in skin cells to produce more ATP energy, and replace damaged cells with newly generated healthy cells.
- Inhibit sebum secretion: Red light therapy can inhibit sebaceous gland secretion, reduce discomfort caused by excessive sebum secretion.
- Reduce inflammation: Red light therapy can reduce inflammation and alleviate the inflammatory response associated with acne to reduce acne problems.

Fat Burning

- Stimulate muscle cell metabolism: Red light therapy can penetrate deep into the muscles, stimulate the mitochondria in muscle cells, and help the muscles better consume fat.
- Accelerate fat breakdown: Red light therapy can activate enzymes and metabolites in the body, accelerate the speed and way of fat breakdown, and help the body burn fat faster.
- Increase metabolic rate: The stimulating effect of red light therapy can increase the body's metabolic rate, allowing the body to continue to burn more energy while at rest.

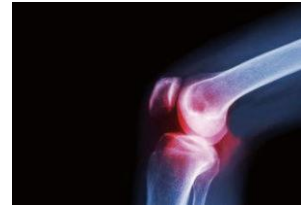

Hair Growth

- Increased blood flow: Red light therapy can help increase blood flow to the scalp, providing more oxygen and nutrients to the hair follicles and promoting healthier hair growth.
- Reduced inflammation: inflammation can damage hair follicles and lead to hair loss. Red light therapy has been shown to reduce scalp inflammation, which can help protect the follicles and promote healthier hair growth.
- Stimulated hair follicles: Red light therapy can stimulate hair follicles, resulting in increased hair thickness and density.

Inflammation

- Pain and discomfort relief: Red light therapy can help relieve pain and discomfort by enhancing blood circulation, which may be especially useful for inflammation sufferers.
- Promote healing: Red light therapy can promote metabolism, stimulate cell growth and regeneration. This is because red light can increase energy production, help cells operate better to accelerate the healing of inflammation.
- Reduce inflammation response: Red light therapy can improve cellular function and metabolism, reduce inflammation response, help control inflammation and relieve inflammation-related symptoms.

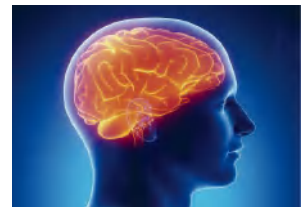

Mental Health

- Relieve anxiety and stress: Red light therapy can help alleviate anxiety and stress by increasing endorphin levels in the blood and reducing the secretion of stress hormones, making people feel relaxed and comfortable.
- Boost self-confidence: Red light therapy can improve people's psychological state, enhance self-confidence and self-esteem.
- Alleviate psychological imbalances: Red light therapy can help people alleviate psychological imbalances, including depression, anxiety, mental illness, etc.

Brain Improvement

- Increase the survival rate and metabolic ability of nerve cells, enhance the activity of neurons, improve communication efficiency between brain neurons, and strengthen memory and learning abilities.
- Promote the growth and proliferation of neural stem cells, enhance the self-repair and regenerative ability of the nervous system.

- Reduce the symptoms of brain neurodegeneration by inhibiting the production of inflammatory factors and reducing cell stress.

Sleep Optimization

- Promote the secretion of melatonin by the pineal gland: Red light therapy can stimulate the pineal gland to secrete melatonin, a hormone that regulates the biological clock and helps regulate sleep rhythms.
- Improve sleep quality: Red light therapy can improve the excitability of the human nervous system, balance nervous system function, help eliminate anxiety and tension.
- Alleviate sleep disorders: Red light therapy can also relax muscles, relieve tension, and alleviate sleep disorders such as insomnia and nocturnal awakenings, creating a more comfortable sleep environment.

Muscle Recovery

- Improve blood flow: Red light penetrates deeply into muscle tissue and blood vessels, increasing blood circulation, oxygen, and nutrient supply.
- Reduce fatigue: Red light therapy promotes lactic acid metabolism, improving muscle function and reducing fatigue, resulting in faster muscle recovery.
- Boost muscle vitality: Red light therapy improves cell vitality and metabolism in muscle tissue, enhancing muscle responsiveness and reducing the risk of muscle damage.

Enhance Strength

- Repair muscles and enhance strength: Red light therapy boosts muscle tissue metabolism, promoting repair and regeneration of damaged muscles.
- Improve muscle function: Deep red light penetration stimulates energy production and enhances muscle function, making strength training more effective.
- Boost muscle creatine: Red light therapy increases muscle creatine content, which provides energy storage and enhances muscle strength.

Notes:

- 1) As a non-invasive therapy device, red light therapy will not cause harm to the body, but prolonged exposure or high frequency may cause skin damage.
- 2) If there is any adverse reactions when using red light therapy devices, stop immediately.
- 3) All usage suggestions are for reference only and should not be used as professional medical guidance. If treating related diseases, please seek professional medical guidance.

BM-Slim

Portable Series

How to make yourself beautiful and healthy anytime, anywhere?
A portable red light therapy device can easily serve it.

BIOMOL's portable series uses a large capacity battery, which can easily be used for more than a week when fully charged.

Small in size, easy to carry, essential for travel, uninterrupted enjoyment and no burden on luggage.

Smart program, touch key&screen, easy to operate.

Just enjoy it!

BM-MiNi *(Patented product)*

Features

- Small and portable just like an iPhone. Become more beautiful and healthier anywhere at anytime.
- Rechargeable. Just with a Type-C cable, no worry about service interruption at any time.
- Simple operation, one touch start and timed close. Simply enjoy professional care.
- FDA certification provides a full range of use guarantees.

- Wired controller with built-in battery 2000mAh, 3 gear for easy adjustment, 3 different timing 15/20/30 minutes.
- FDA certification provides a full range of guarantees.

Item	BM Mask
LED	Face: 92 x 0.2W LED Neck: 80 x 0.2W LED
Spectrum	415nm/605nm/635nm/850nm
Beam Angle	90 degrees
Control way	Controller
EMF Emission	0.0μT
Flicker	Flicker free
Warranty	One year
Weight	Face/Neck: 0.2KG/0.5 LB
Size	Face: 315 x 219 x 5mm 12.4" x 8.6" x 0.2" Neck: 325 x 247 x 5mm 12.8" x 9.7" x 0.2"
Packing	360 x 260 x 50mm(1pc) 14.2" x 10.2" x 2"

BM Cap

Features

- Inner cap and outer cap for enhanced comfort, 2 colors RED and NIR, 2 different Pulse frequencies of 10Hz and 40Hz.
- Button controller with built-in battery 2000mAh, 3 gear for easy adjustment, with a default timing of 30 minutes.
- FDA certification provides a full range of guarantees.

Item	BM Cap
LED	150 x 0.5W LED
Spectrum	660nm/850nm
Beam Angle	90 degrees
Control way	Button Controller
Battery capacity	2000mAh
Recharging time	60min
EMF Emission	0.0 μ T
Flicker	Flicker free
Warranty	One year
Weight	0.3KG/0.7LB
Size	300 x 200 x 120mm 12" x 7.9" x 4.7"
Packing	350 x 230 x 160mm(1pc) 13.8" x 9.1" x 6.3"

BM Pad

Features

- 2 colors RED and NIR, 2 different Pulse frequencies of 10Hz and 40Hz for better body therapy.
- Button controller with built-in battery 2000mAh, 3 gear for easy adjustment, with a default timing of 30 minutes.
- FDA certification provides a full range of guarantees.

Item	BM Pad
LED	82 x 0.6W LED
Spectrum	660nm/850nm
Beam Angle	90 degrees
Control way	Button controller
Battery capacity	2000mAh
Recharging time	60min
EMF Emission	0.0 μ T
Flicker	Flicker free
Warranty	One year
Weight	0.16KG/0.35LB
Size	800 x 210 x 18mm 31.5" x 8.3" x 0.7"
Packing	230 x 160 x 80mm(1pc) 9.1" x 6.3" x 3.1"

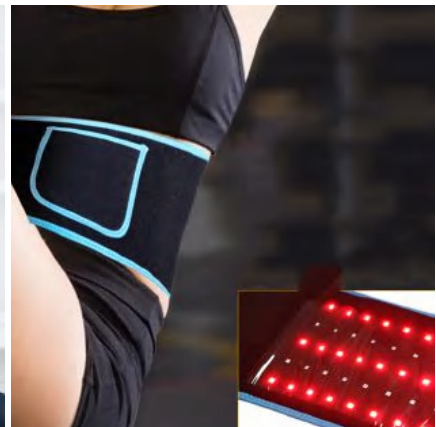

BM Belt

Features

- Stable compression belt to prevent displacement and freely adjust pressure comfort.
- Wired controller with timing and brightness adjustment for easy operation.
- FDA certification provides a full range of guarantees.

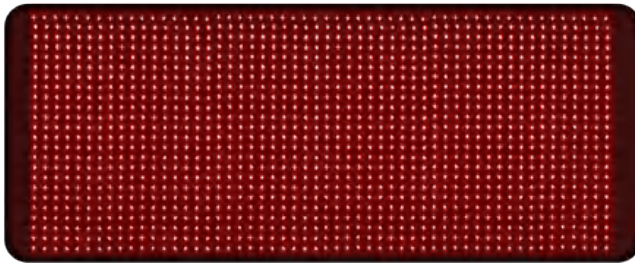

Item	BM Belt
LED	105 x 0.2W LED
Spectrum	660nm/850nm
Beam Angle	90 degrees
Control way	Controller
EMF Emission	0.0 μ T
Flicker	Flicker free
Warranty	One year
Weight	1KG/2.2LB
Size	1250 x 210 x 6mm 49" x 8" x 0.2"
Packing	280 x 240 x 120 mm(1pc) 11" x 9.4" x 4.7"

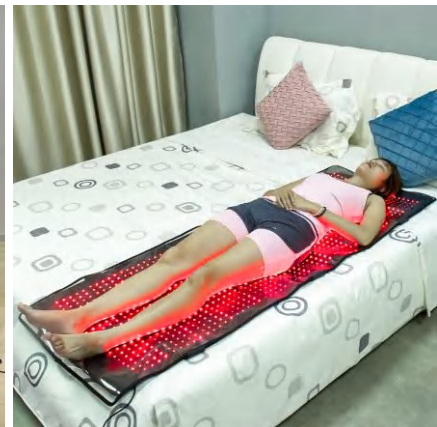

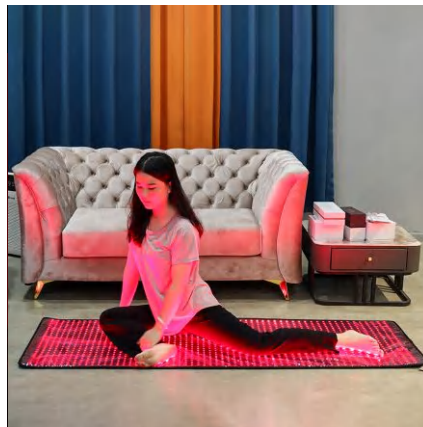

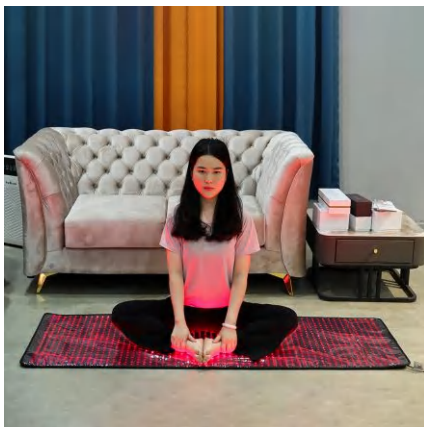

BM Mat

Features

- 2 colors RED and NIR, 2 different Pulse frequencies of 10Hz and 40Hz for better body therapy.
- Wired controller with timing, modes, brightness, pulse adjustment for easy operation.
- FDA certification provides a full range of guarantees.

Item	BM Mat
LED	1440 x 0.5W LED
Spectrum	1 x 660nm/2 x 850nm
Beam Angle	90 degrees
Control way	Controller
EMF Emission	0.0 μ T
Flicker	Flicker free
Warranty	One year
Weight	2KG/4.4LB
Application	Full body
Product size	1750 x 600 x 6mm 69" x 24" x 0.4"

Others

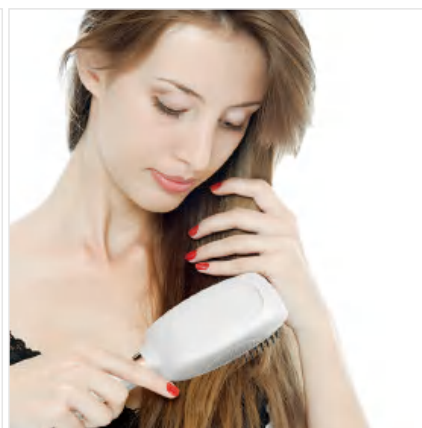

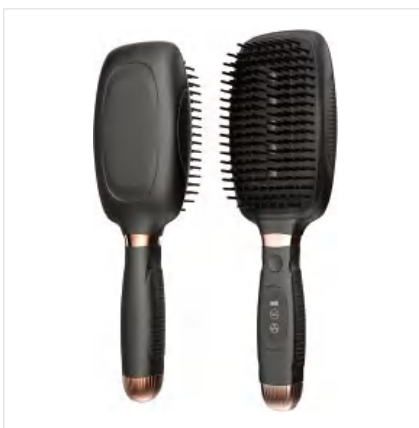

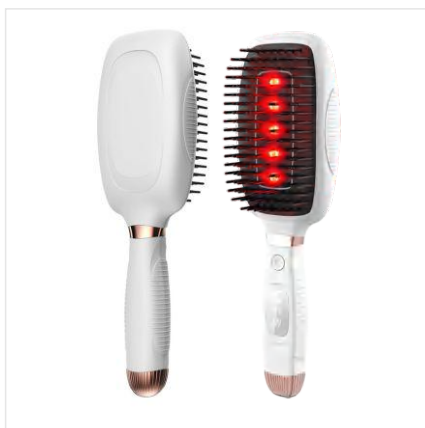

BM Comb

Features

- LLLT Laser Thermal Therapy, specific wavelength with good penetrating power.
- BIO-EMS stimulates the meridians in the head and revitalizes the pore capsule.
- Vibration massage enhances hair follicle metabolism, soothes the nerves in the head.

Item	BM Comb
Rated power	1W
Rated voltage	5V==
Spectrum	660-785nm
Vibration	Yes
Battery capacity	400 mAh
Charging time	2-3 hours
Warranty	One year
Weight	100g
Size	220 x 60 x 40mm 8.7" x 2.4" x 1.6"
Packing	270 x 110 x 68mm(1pc) 10.6" x 4.3" x 2.7"

Red light Bulb

Features

- Aluminum house casing, good heat dissipation.
- Portable, weight 600g, convenient for hand-held use and carrying.
- 2 colors RED and NIR, the Switch Rope is compatible with E27 sockets, convenient and user-friendly.

Item	BM Bulb
LED	12 x 2W LED
Spectrum	660nm/850nm
Beam Angle	60 degrees
Control way	Switch
EMF Emission	0.0 μ T
Flicker	Flicker free
Warranty	One year
Weight	0.6KG/1.32LB
Size	120 x 120 x 125mm 4.8" x 4.8" x 5"
Packing	680 x 290 x 35mm(20pcs) 27" x 11.5" x 14"
